Name _____

Graded Homework to be Submitted

- Student's papers are to show their name and reflect the section number.
- All answers are to be circled where appropriate.
- All graphs are to be labeled.
- Work is to be graded with a red pen with a

to show the problem is correct and a X if the problem is incorrect. Incorrect problems may be tried over and over till the student either determines the correct answer or decides to quit the process.

- Homework needs to be in a notebook, or folder with the student's name clearly marked.
- Answers yellow highlighted where appropriate (not graphs or essays).
- Staple all papers together if submitted

Use the following chart to give the total grade for the homework submitted. To Determine Percent Correct, divide Total Correct number by Total Problems.

Section # 1	Total Problems 2	Total Wrong 3	Total Correct 4	Percent Correct Column 4/ column 2 5	Instructor Notes 6

Be sure to calculate average of average points

Add up percent Correct divided by total Number of sections
