Chapter tests

- Students must be registered with MyMathLab (CourseCompass) before they can take a chapter test.
- There are 8 chapter tests.
- Chapter tests will make up 40% of the grade.
- Students will take each chapter test online at home.
- Students have 2 hours to finish a chapter test. Then, click submit.
- The deadline for each chapter test is on the Important Dates link.
- For every section there are about 60 exercises. Select an exercise set to practice. When you have finished the exercise, either click Similar Exercise to try the same problem with new values, or return to this menu to select a different exercise. Your work on these exercises will not be tracked.
- I have assigned homework for each section. The homework assignments prepare you for the sample chapter tests and the chapter tests. The homework assignments will not be graded.
- For every chapter test there is a sample test. Take a chapter sample test to practice.
- Students have 2 chances for each chapter test. If you are not satisfied with your test score, then you can take the exam for the second time. If you take a chapter test twice, the program will record the second test score.
