

Math 122 - Homework

Homework is optional in this course. However, your success in calculus is strongly related to the amount of homework you do. As an incentive to encourage students to do the homework, and thus improve their exam scores, I will replace your lowest regular exam score with your homework point total if the homework total is higher. I suggest that you copy the original problem down where possible. Also show plenty of work. The final exam is open notebook, and it will be beneficial to you at that time to have the original problem should one of the problems appear on the test.

Each section of homework will be worth 3 points. There are 34 sections of homework worth 102 points, but the maximum grade you may receive is 100. There are 541 problems for an average of about 16 per section.

Grade your own homework according to the answers in the back of the textbook. Record the number missed and the number correct as a fraction (8/9) and percent 89% at the top of the first page of each section of homework. Assign 3 points if you have at least 85% of the problems correct. Assign 2 point if you have at least 70% correct. Assign 1 point if you have at least 50% correct and assign 0 points if you have less than 50% of the problems correct.

Record your point totals in the table below and turn in the homework and this point total sheet during each exam.
