

Math 116 - Homework Problems

The homework is optional, but highly suggested. There are 46 sections of homework worth 92 points. One additional point will be given for each chapter in which homework is submitted, bringing the total possible to 100 points. If your homework total is higher than your lowest test score, the lowest test score will be replaced by the homework total. If your homework total isn't higher than your lowest test score, then the homework grade will not be counted. All the problems listed should be worked, but only the odd problems should be graded and counted.

The homework should be submitted at the beginning of the class period on day of the exam. Record the points for each section, and total the points for each chapter on this sheet. Leave this sheet at the beginning of the notebook.

Scoring (per section)
2 pts: 80 - 100% correct
1 pt: 50 - 79% correct
0 pts: under 50% correct

All exercises are odd except where noted. Instructions and a [sample section](#) are available.
