

Math 113 – Intro to Applied Statistics

Spring 2017 Course Syllabus Highlights

This paper contains the highlights from the full syllabus, which is available on the instructor's website.

Course Meeting Information

The Spring 2017 semester begins January 17, 2017, and ends May 19, 2017.

- MATH 113-01 meets Monday, Wednesday, and Friday from 9:00 – 10:10 am in room S137.
- MATH 113-02 meets Monday, Wednesday, and Friday from 2:30 – 3:40 pm in room S137.

This is a face-to-face course, but the Canvas learning management system will be used.

Instructor Information

James Jones, Professor of Mathematics

Phone: 217-875-7211, ext 6490

Email: james@richland.edu

Office: C223

Web: <https://people.richland.edu/james/>

Canvas: <https://richland.instructure.com>

The best way to contact the instructor outside of class is through Canvas or by email. Please do not leave a voice mail as it will not reach the instructor in time to help you.

Office Hours

I spend most of my office hours in the classroom, room S137. Meeting in the classroom provides greater access for students to get help with their assignments, homework, projects, quizzes, exams, and questions.

- Monday: 10:10 - 10:30a, 11:40a - 12:00n, 2:10 - 2:30p, 3:40 - 4:50p
- Wednesday: 10:10 - 10:30a, 11:40a - 12:00n, 2:10 - 2:30p
- Friday: 10:10 - 10:30a, 11:40a - 12:00n, 2:10 - 2:30p

Students are encouraged to come to class early each day and use that time to ask questions of the instructor, work on projects, or just socialize with other students in the course.

Text

Introductory Statistics with Randomization and Simulation, 1st edition. David M. Diez, Christopher D Barr., and Mine Çetinkaya-Rundel. OpenIntro. ISBN 978-1-50057-669-1 (required)

To download a free PDF version of the textbook, go to <https://www.openintro.org>. If you would like a printed (non-color) version of the textbook, it is [available on Amazon for \\$8.49](#).

Grading Policy

Letter grades will be assigned to final adjusted scores as follows:

A: 90-100% B: 80 - 89% C: 70-79% D: 60-69% F: below 60%

Normal rounding rules apply, so a 79.5% will be considered a "B". The final score will be weighted according to percentages decided upon by the students.

Highlights

- You are responsible for all information given in class, even if you are absent.
- Assessment and evaluation will be incorporated into the daily classroom experience. There is no make-up of these daily assessments or quizzes given through Canvas.
- There are no traditional exams in this course. Rather than having a few high-stake assessments, we will have frequent low-stake assessments.
- A 10% grace factor will be applied to in-class interactive concept assessments. That is, a 20 point assessment will be recorded as having 18 possible points.
- The lowest grade will be dropped for each of the concepts, discussions, and activities categories. No project grades will be dropped.
- No late work will be accepted after the final.
- Scoring may change if mistakes are found in the grading. This is particularly true of Canvas quizzes. Your score may go up or down, so do not settle for the minimum score.
- Attendance is essential in this course. You *may* be dropped if you miss the first day of class or any two consecutive days after that without communicating with the instructor.
- There are some group projects where the students pick their own groups. If you have poor attendance or have previously shown yourself to be a poor team member, others may not want you on their team and you may end up completing the project alone.
- You do not need a *graphing* calculator, but you should bring a scientific calculator every day.
- You will need to spend time outside class working on projects. Rent Minitab for \$30 (free 30-day trial) to work from home (Windows only). <http://www.onthehub.com/minitab>
- Participation in weekly discussions should be spread throughout the week.
- Projects and discussions are graded holistically using an *awesome* (105%), *good* (90%), *okay* (75%), *fair* (60%), *poor* (45%), and *none* (0%) system.
- Your grade in Canvas may show a + or - after the grade. These are advisory in nature and will not appear on your transcript.
- This course makes heavy use of technology, but it is not the focus of the course.
- Critical thinking is a key component of this course. The instructor will almost never give a simple answer, but guide the class towards applying their knowledge to answer it themselves. You should not assume that you are wrong when you are asked "Are you sure?" or "Is it?" but use that opportunity to think about why.
