

Mathematics History Project

A person is to be chosen that has made a significant contribution to the field of mathematics. You will submit a list of mathematicians from the text. You will list in a ranked fashion your top 5 choices for the research project and these choices will come from your list from the text or others you find in your readings and research.

The paper is to be 3 to 4 pages that is double spaced. In addition to the three to four pages, it will have a cover page and a separate bibliography page. All quotes and information must be cited correctly. There are to be at least 3 different sources in your paper. You may use more than 3 sources. Only one of these sources may be from the internet. Your text will not serve as one of the 3 sources.

Purpose: To discover the lives that were led by the men and women who developed mathematical ideas. It is important to focus on the networks that were developed between many of these people. Examine the background and living conditions of the mathematicians. Examine what drove these scholars and other interests they may have had. Explore the most outstanding aspect of the person researched.
